About us

Established
1998

Step into the world of **EURO-PACK LOGISTICS** - the specialist in temperature-controlled goods handling.

As a trusted partner, we manage the complete supply chain for frozen, temperature-sensitive and ambient goods, from storage to delivery.

Our mission

The mission of **EURO-PACK LOGISTICS** is to provide stable, efficient and designed for growth logistics solutions for the handling of frozen and temperature-controlled products.

Our processes are defined by accuracy, reliability and continuous improvement, enabling us to deliver predictable operations and long-term business value for our partners at every point of the supply chain.

Our vision

Our goal is to become one of Central Europe's leading temperature-controlled logistics providers, shaping the future of the industry through innovation, a high level of service and sustainable operations, while building lasting trust with our partners.

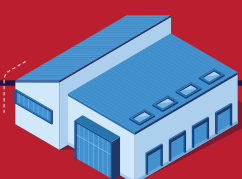

Company history and development milestones

We are proud that, with our well-trained team nearly 100 employees, we serve our customers to the highest standard at both of our sites.

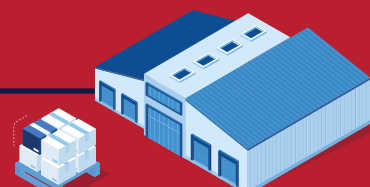

1998

company founded

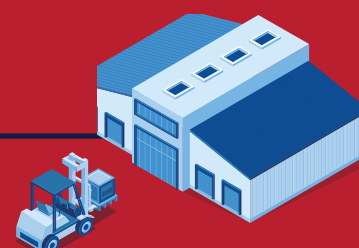

2013

Vecsés, first cold store, 300 pallet positions

2019

Üllő, 4,200 frozen pallet positions, 5,000 ambient pallet positions

2024

Debrecen, 14,000 frozen pallet positions, 2,000 ambient pallet positions

2025 - Spring

Üllő, 4,500 frozen pallet expansion

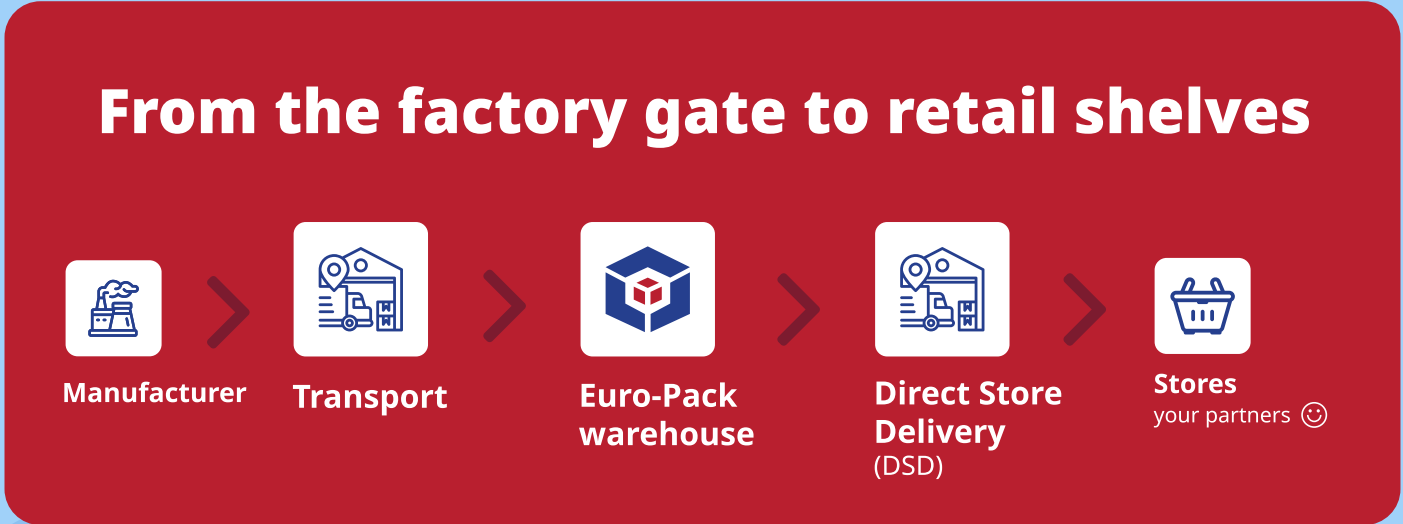

2025 - Autumn

transport and commercial business units established

Our services

The purpose of the service is for storage and transport/distribution within the manufacturer's supply chain to operate as a unified, controlled and data-driven system with nationwide coverage. The model is built on improving cold-chain safety, service level and cost efficiency.

WAREHOUSING

Frozen goods

Frozen products require specialist handling. Our modern refrigeration and freezing equipment, together with the related monitoring systems, ensures that products are always stored at the required temperature, preserving their freshness and quality.

➔ More than **211 million kg** of food handled each year

Ambient goods

Our expertise extends beyond frozen product handling. Through our logistics centres, we also support our partners with scalable solutions for storing ambient-temperature goods.

Frozen

e.g. ready-to-cook products, meat, vegetables, bakery products

-18°C

storage capacity:
22,000 pallet positions

Chilled

e.g. dairy products, cheeses, salads

+2-4°C

storage capacity:
2,000 pallet positions

Controlled ambient

e.g. filled biscuits, chocolates, cakes

+15-18°C

storage capacity:
3,500 pallet positions

Dry

e.g. snacks, pasta, canned goods

non-temperature-controlled

storage capacity:
4,000 pallet positions

Our sites comply with the strictest food safety requirements.

Quality management: operations in line with an internationally audited IFS Logistics system.

ORDER PICKING

One of the most critical points in logistics is accurate and fast order picking. The result of our work: transport units and product packages picked on time, carefully packed, accurately documented and handed over intact.

Performance and control

Order picking in frozen storage areas

20–22.000
cases picked
per day

(onto pallets or into special transport boxes)

accuracy above
99,4%

Continuous monitoring
of picking and stock movements

Controlled operations and transparency

ISO 9001
and ISO 14001

Operations in
accordance with
IFS Logistics
version 3.0

ZEUS warehouse
management soft-
ware for controlling
day-to-day
operations

Transparent operations

Direct online access to the ZEUS system for customers
(stock tracking).

Stocktaking available even on a monthly basis (Power BI, AI, FC).

COMMERCIAL SERVICES

Euro-Pack Logistics' commercial service forms a bridge between manufacturers and consumers, enabling our partners' products to reach end users efficiently across the entire supply chain.

Our service goes beyond conventional logistics

we offer a **comprehensive solution** that includes **store-level distribution**, support for sales processes and - if required - their **full end-to-end management**.

As a result, our partners can:

access
new reseller
channels

increase
their market
coverage

expand their
sales in a
structured and
controlled way

predictability
of sales
volumes

direct capture
of market
feedback

continuous
development
of business
opportunities

The process is supported by our dedicated
telesales team, which ensures:

Our aim is to be more than a logistics provider for our partners:
an active partner in sales and market growth.

FLEET, TECHNOLOGY AND PERFORMANCE MEASUREMENT

Vehicle categories

3,5t | 7,5t
12t | 40t

(adapted to volume
and loading conditions)

Company-owned fleet
operated by **Euro-Pack**, with
a dedicated maintenance
programme.

Average vehicle age: **2,8 years**
low failure rate and stable availability.

Technology and KPIs

Full GPS,
telematics and tem-
perature-monitoring
system with real-time
data transmission.

Real-time tracking:
delivery status and
temperature data.

Digital
documentation (CMR
notes, delivery notes,
warehouse check-in)
- paperless logistics.

Delivery accuracy:
above 98%;
cold-chain integrity:
99.5% compliance.

Savings from
route and run
optimisation:
12-15%.

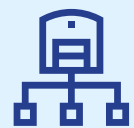

Central KPI system:
accurate data collec-
tion, weekly reporting
and SLA-based perfor-
mance measurement

Why choose contract logistics instead of investing?

Using logistics as a service **provides flexibility in capacity management** and can be easily adapted to changes in volumes.

The changing capacity requirements caused by seasonality, volume peaks and **strategic purchasing are handled by an external warehouse** (*volume-based cost*).

Instead of major investment (*CAPEX*), the **required capacity** can be secured through a **volume-based variable cost** (*OPEX*).

Payroll-related costs and benefits can be converted into a **service fee**, with savings on the associated additional expenses.

Reliability and quality can be ensured through strategic, long-term cooperation.

Industry benchmark: the automotive industry has an especially high uptake of external logistics services (*storage, order picking, inbound deliveries*).

Why choose us?

Innovation and technology

Our sites are equipped with state-of-the-art technology, and our advanced warehouse management systems and real-time inventory records support efficiency and reliability.

Experience and commitment

Our team members have many years of professional experience and are committed to always offering the best solutions for our customers.

Supplier performance evaluation and periodic audits for storage safety.

Continuous training opportunities to maintain and improve the established service level.

To support effective cooperation, we work with **favourable prices and flexible service terms**.
